Why invest in Madrid?

A city for living

A welcoming capital city that offers great quality of life

Madrid is at the top of the ranking of the world's most liveable cities.

This is because of important factors such as the quality of its **public services, safety, cultural and leisure options**, as well as its **flexible work models**.

1st

in Europe in
life expectancy
(Eurostat 2022)

2nd

most sustainable
city in the world
(Sustainable Travel
Index - Euromonitor, 2023)

4th

most liveable
city in the world
(Mori Global Power
City Index 2022)

A complete educational system

The top-quality educational options in Madrid cover **all educational cycles and models**, from primary school to internationally renowned university and postgraduate studies.

Schools

585 state-run schools

570 privately-run schools

371 partially state-funded schools

A global learning environment: renowned international schools and a wide range of bilingual educational options

Spain's High-Speed Rail system will be unified, expanded and liberalised, with Madrid as its centre

Madrid Nuevo Norte

02

The project

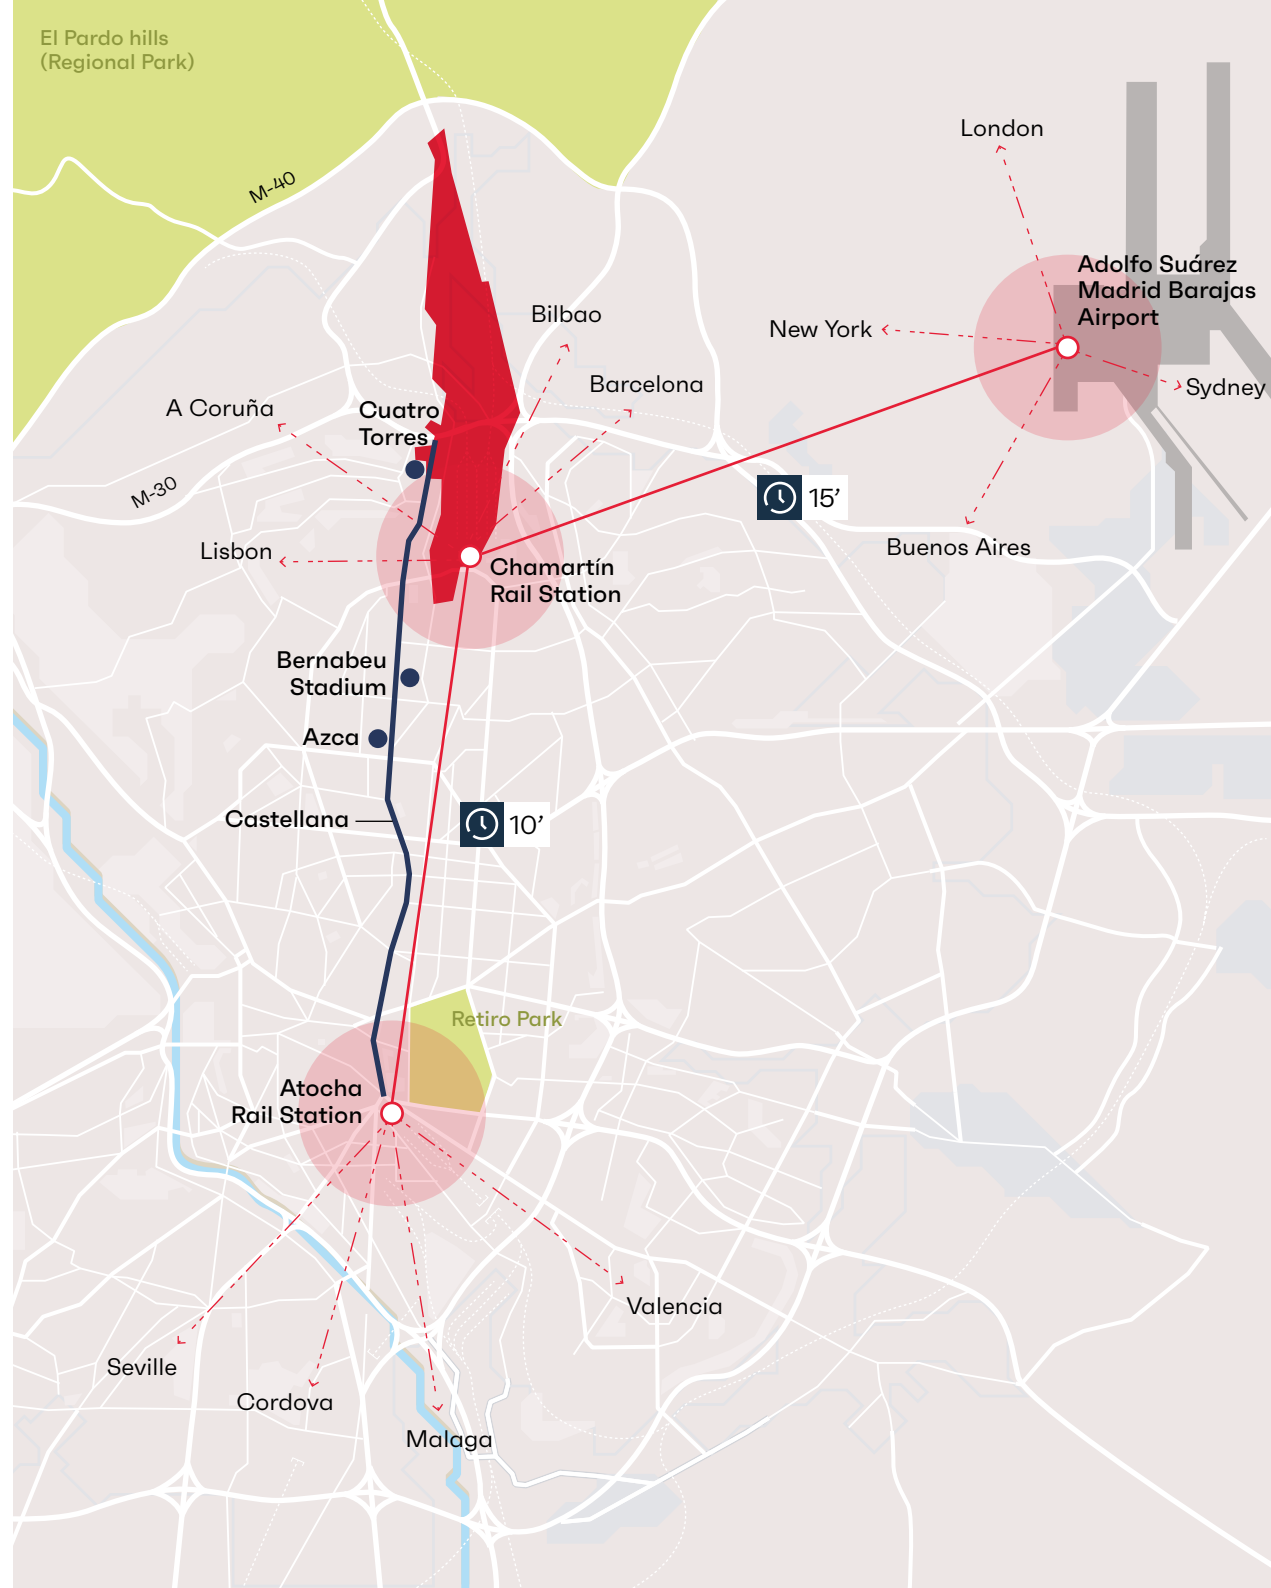

Context and magnitude

Strategic location

Madrid Nuevo Norte is strategically located in the northern area of the capital, **in the heart of Madrid's urban and business hub.**

The **Madrid-Chamartín-Clara Campoamor Station** is located inside the project area, with its immense potential to connect to the rest of Madrid and Spain.

The project is also located just minutes from Adolfo Suárez Madrid-Barajas International Airport. Madrid Nuevo Norte will have maximum accessibility to the rest of the city and the region thanks to a hyper-connected public transport network and direct access to the M-30 and M-40 ring roads and the A-1 motorway.

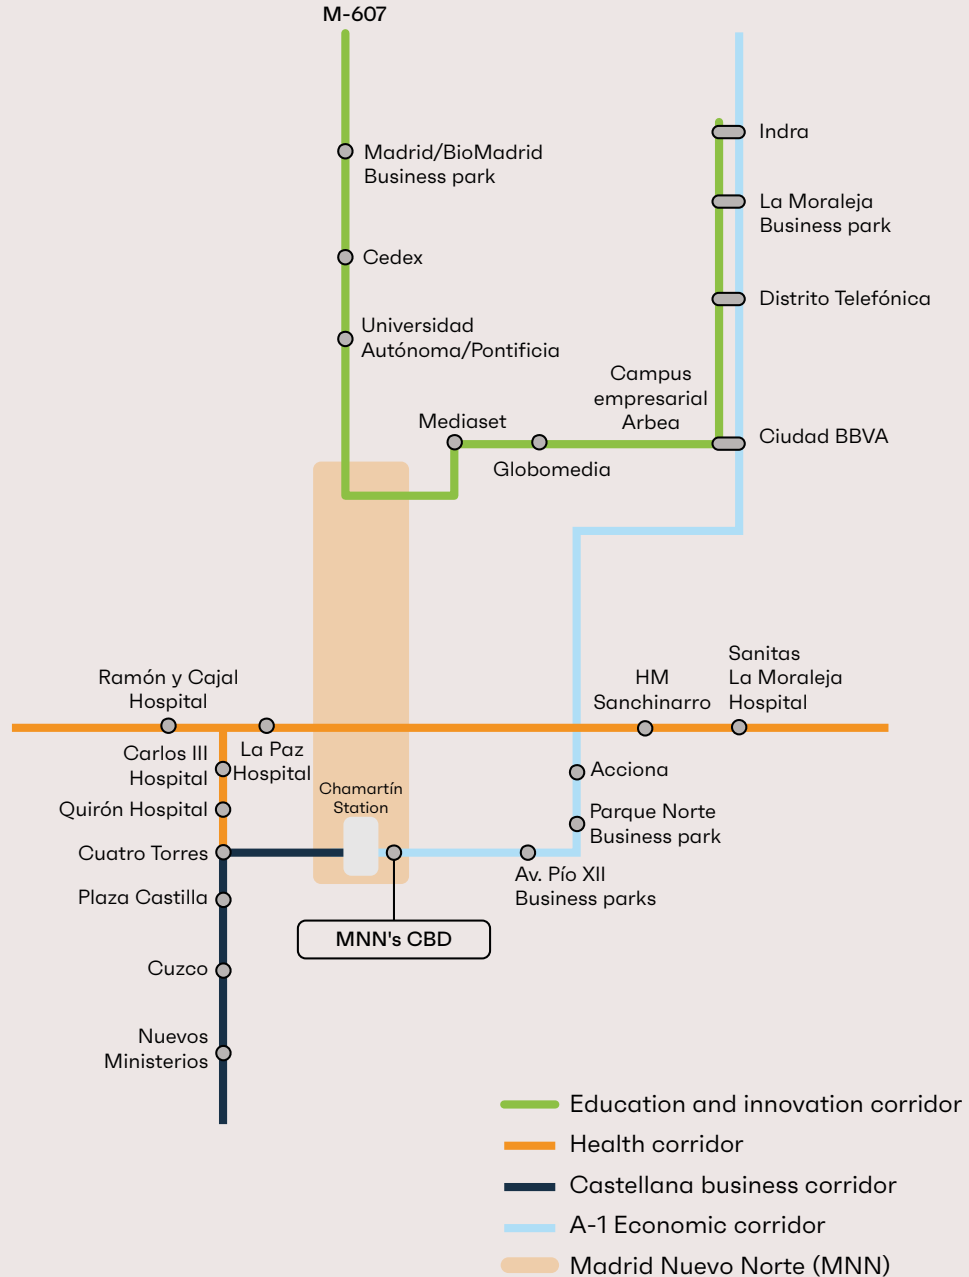

Scope

Madrid Nuevo Norte will be developed over an area of approximately **2.36 million square metres**. The project's north-south distance is the same as the distance between Plaza de Castilla and the Neptuno fountain, in the historical city centre.

Axes of activity

The **city's main economic hubs** converge in Madrid Nuevo Norte, along with other areas of activity such as healthcare, education and technology.

What's happening in the north of Madrid?

A variety of important projects of different sizes are currently underway in the northern part of the capital.

1 CIUDAD DE LA SALUD

Comprehensive reform of the La Paz Hospital and a new campus for healthcare, teaching and research activities. The surface area is doubled, up to 550,000 m², with a public investment of € 1,000 M.

2 METROPOLITAN FOREST

A 75 km wooded ring with 100,000 indigenous trees surrounding Madrid. It connects to Madrid Nuevo Norte's network of parks.

3 NORTH JUNCTION

Second phase of remodelling the strategic junction that will reduce CO₂ emissions by 70%.

4 AZCA

The old CBD is being renovated as part of a private initiative to apply sustainability criteria and create a new contemporary image.

5 SANTIAGO BERNABÉU STADIUM

With a budget of € 575 M, the stadium will be a new icon of the city. It will have spaces for leisure, restaurants, a museum and will renovate 66,000 m² of urban environment.

6 CLESA

"Oria Innovation Campus": a mixed-use complex with offices, student housing, rental housing, and a research centre.

7 IE TOWER

A mixed-use tower in the Cuatro Torres business complex, with a business school (IE), a private clinic (Quirón) and 16,000 m² of commercial and leisure areas.

8 CENTRO INTEGRAL DEL TRANSPORTE (CIT)

Madrid Metro headquarters and future Metro museum.

A strategic project

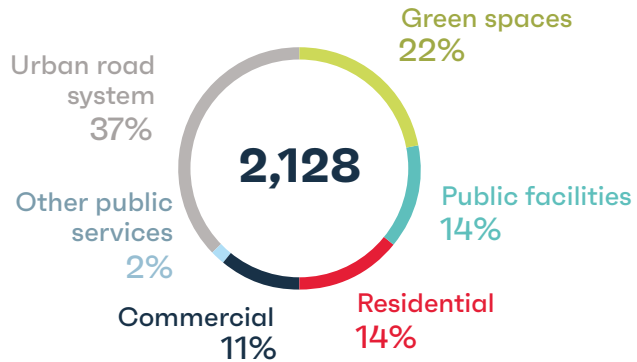

A dense, compact environment for a variety of uses

Madrid Nuevo Norte’s urban planning is dense, compact and is designed for a mixture of uses, seeking to promote **urban life**, **economic activity** and **the welfare of citizens** at all scales.

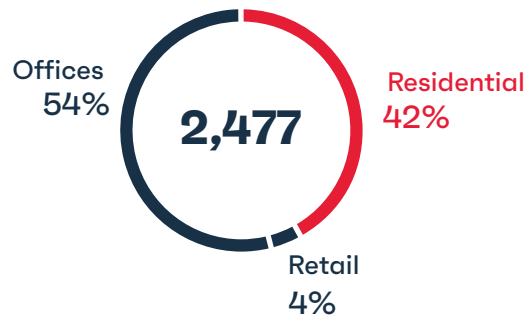

- Green spaces
- Public facilities
- Residential
- Commercial
- Other public services
- Transport services

Sectors and buildable Gross Floor Areas

For management purposes, the project is divided into **four domains**. These are governed under the same guidelines of sustainability, innovation and urban regeneration while also respecting the specific physical characteristics and identities of each one at all times.

Key economic impact for Spain

Madrid Nuevo Norte and the public infrastructure associated with the renovation of the north of the capital will also have an economic impact on the region and on the country as a whole. This effect was analysed in a study by the L. R. Klein Institute for Economic Forecasting, attached to the Universidad Autónoma de Madrid (UAM).

Over the course of the project's 24-year life span, Madrid Nuevo Norte will have a significant impact on the regional and national economies. In Spain **it will generate a total of:**

Impact on national GDP

€ 15.2 B

Total capital flows

Case study and example in EU research

*This project has received funding from the European's Union Horizon 2020 research and innovation programme under grant agreement No 101037075

Madrid Nuevo Norte, an international benchmark

Madrid Nuevo Norte aims to serve as a model of sustainability and innovation for urban developments around the world.

In addition, **it is the first project to be simultaneously pre-certified according to the most prestigious international standards, BREEAM ES URBANISMO 2020 and LEED v4.1 Cities and Communities Plan and Design**, to achieve the highest social, economic and environmental standards.

Ground-breaking urban design, pre-certified by the most prestigious sustainability seals

In line with the 2030 Agenda

Madrid Nuevo Norte has a positive impact on the 17 Sustainable Development Goals (SDGs), contributing to the achievement of 51 targets. It is, therefore, a key element in Madrid's first Voluntary Local Review (VLR) for achieving global objectives in the field of urban planning.

THE GLOBAL GOALS

An ambitious, comprehensive sustainability strategy

A comprehensive strategy has been developed that defines guidelines for urban development projects, with sustainability and liveability as the key aspects in new developments.

This strategy is defined in eight white papers and contains technical analyses, best practices, as well as the requirements, guidelines and implementation strategies.

It also proposes lines of research, pilot tests, roadmaps and the requirements to apply the measures.

Providing solutions to major urban challenges

Urban Design
Green infrastructure

Energy: Decarbonisation
Carbon Neutral

Drainage: Water use
Minimising the water footprint

Circular Economy
Minimise the materials footprint

Accessibility
Urban planning for everyone

Digitalisation
Moving towards smart cities

Last Mile Logistics
Sustainable and innovative

Sustainable Mobility
Design centred around public transport

Construction phase

Demolition waste management:

- > Reduction of +9,000 tonnes of CO₂
- > Reduction of carbon footprint ±70%
- > Reuse of 92% of waste on site + additional 6% in specialised plants

Building construction:

- > Study of life cycle and polluting materials in construction projects
- > Decarbonisation through the design
- > Substitution of gardens for paved surfaces: reduces carbon footprint in construction

Mobility

Change in the mobility paradigm:

- > 80% of trips by sustainable means
- > 13 km cycling network connected to existing infrastructure
- > Walkable city

Intermodality:

- > Hubs and nodes

Public transportation structures urban design:

- > Increased buildable GFA and mix of uses around transportation hubs

Hyperconnected public transport network:

- > Complementary modes of transport

Deterrent measures:

- > Fewer parking spaces
- > Public transport given priority

Decarbonise private transport

- > Deploy electric vehicle infrastructure
- > Shared mobility

Resources & Nature-Based Solutions

Sustainable Urban Drainage Systems:

- > Respecting the water cycle
- > 70% reduction of water discharged to sewer systems
- > Reduction of energy demand management of drainage networks

Reclaimed water:

- > Reduction of drinking water demand: $\pm 48\%$
- > Domestic network for sewage discharge (under study)

District heating and cooling networks

- > Energy savings in offices and homes

Non-renewable consumption: 50% less than the maximum allowed by law

Green infrastructure as a CO₂ sink:

- > Green corridor
- > Connection with regional ecosystems
- > Naturalisation of façades and rooftops

A ground-breaking process for citizen engagement

For the first time in its geographical environment, a project of these characteristics is committed to **informing, consulting and involving citizens** at all stages, with the conviction that the only way to build a city is by placing people at the centre and ensuring social support that guarantees the development's success.

This support is shown by the extent of citizen participation over time and **the historical consensus on the project** by all the public institutions involved in its development, with all of the political groups represented in the Madrid City Council voting in favour of it.

The project involves citizens and groups from the adjacent neighbourhoods, as well as from the entire city of Madrid, taking into account **the diversity of age, gender and abilities**, in order to take their needs into account and incorporate them into the project.

45,306

direct participants

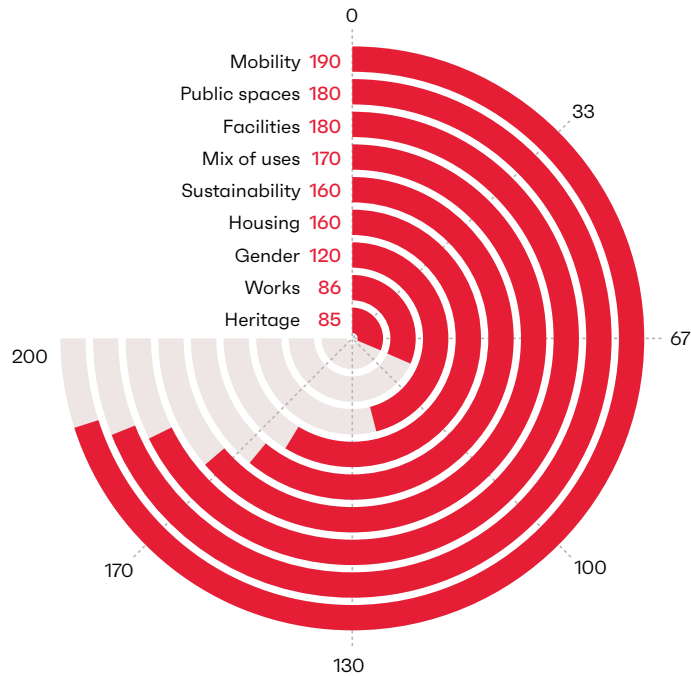

The quality of citizen participation in Madrid Nuevo Norte is evaluated continuously based on the assessment criteria of two international organizations:

> International Association for Public Participation (IAP2)

> National Standards for Community Engagement - Scottish Government

The process also meets BREEAM pre-certification standards

Topics addressed in the participatory process

Madrid Nuevo Norte
is centred around people

Real Estate

Housing

Housing market opportunities

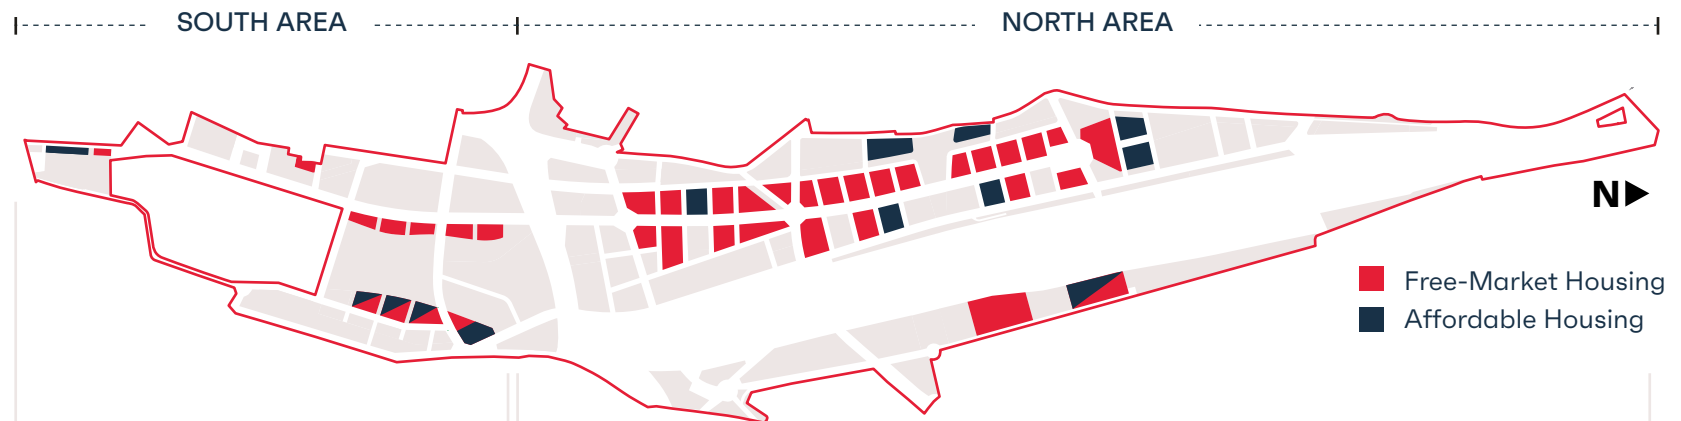

Market context and trends

- > Singles and couples are projected to be the largest growing groups among households in 2035.
- > Homeownership perception has been changing and younger generations do not prioritize purchase over renting.

Second-to-none location for living in Madrid

The proposal of Madrid Nuevo Norte

Full urban accessibility (15 min city)

> Great and diverse number of services. Tailor-made and trendy offer.

> Combination of different typologies for diverse residential demand. Consideration of current expansion of the rental market.

> Residential will boost retail activity across de zone and social activity after business hours.

> Consideration of current expansion of the rental market and alternative living solutions.

> Plots with proximity retail and social infrastructure (i.e. educational and health facilities).

Offices

Office market opportunities

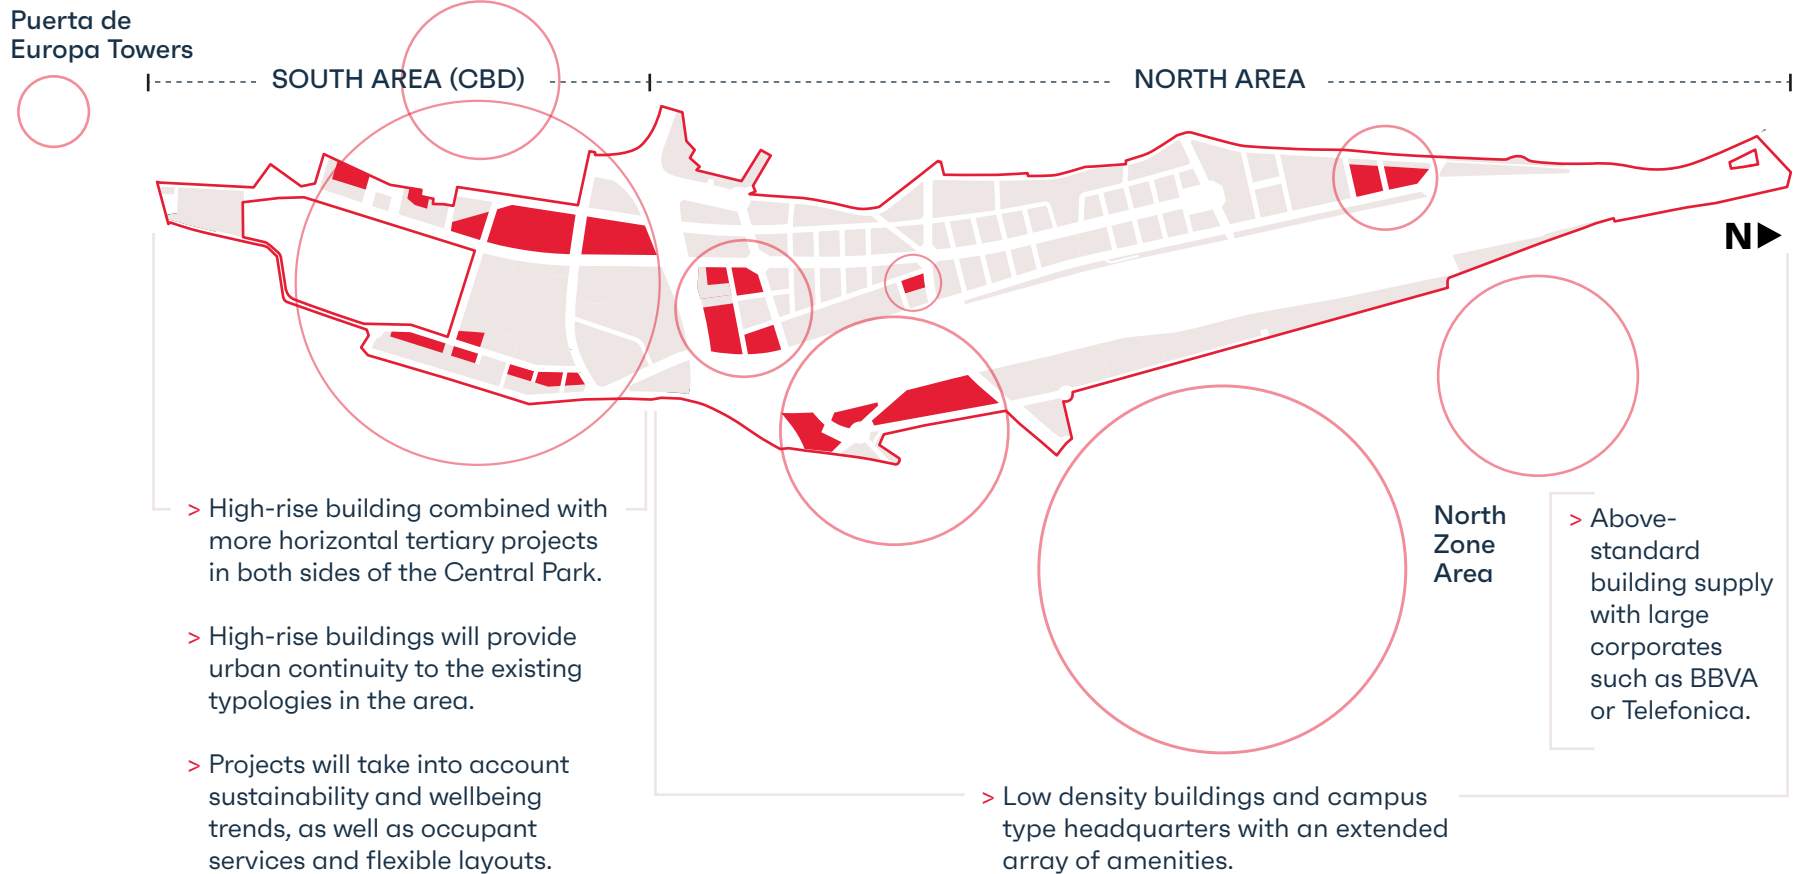

Market context and trends

- > Current Madrid's CBD area has an outdated stock. Scarcity of new developments. More than half of the stock in the CBD is below Grade A.

The proposal of Madrid Nuevo Norte

Cuatro Torres Business Area

Puerta de Europa Towers

A magnet site that will impulse a thriving project

Retail

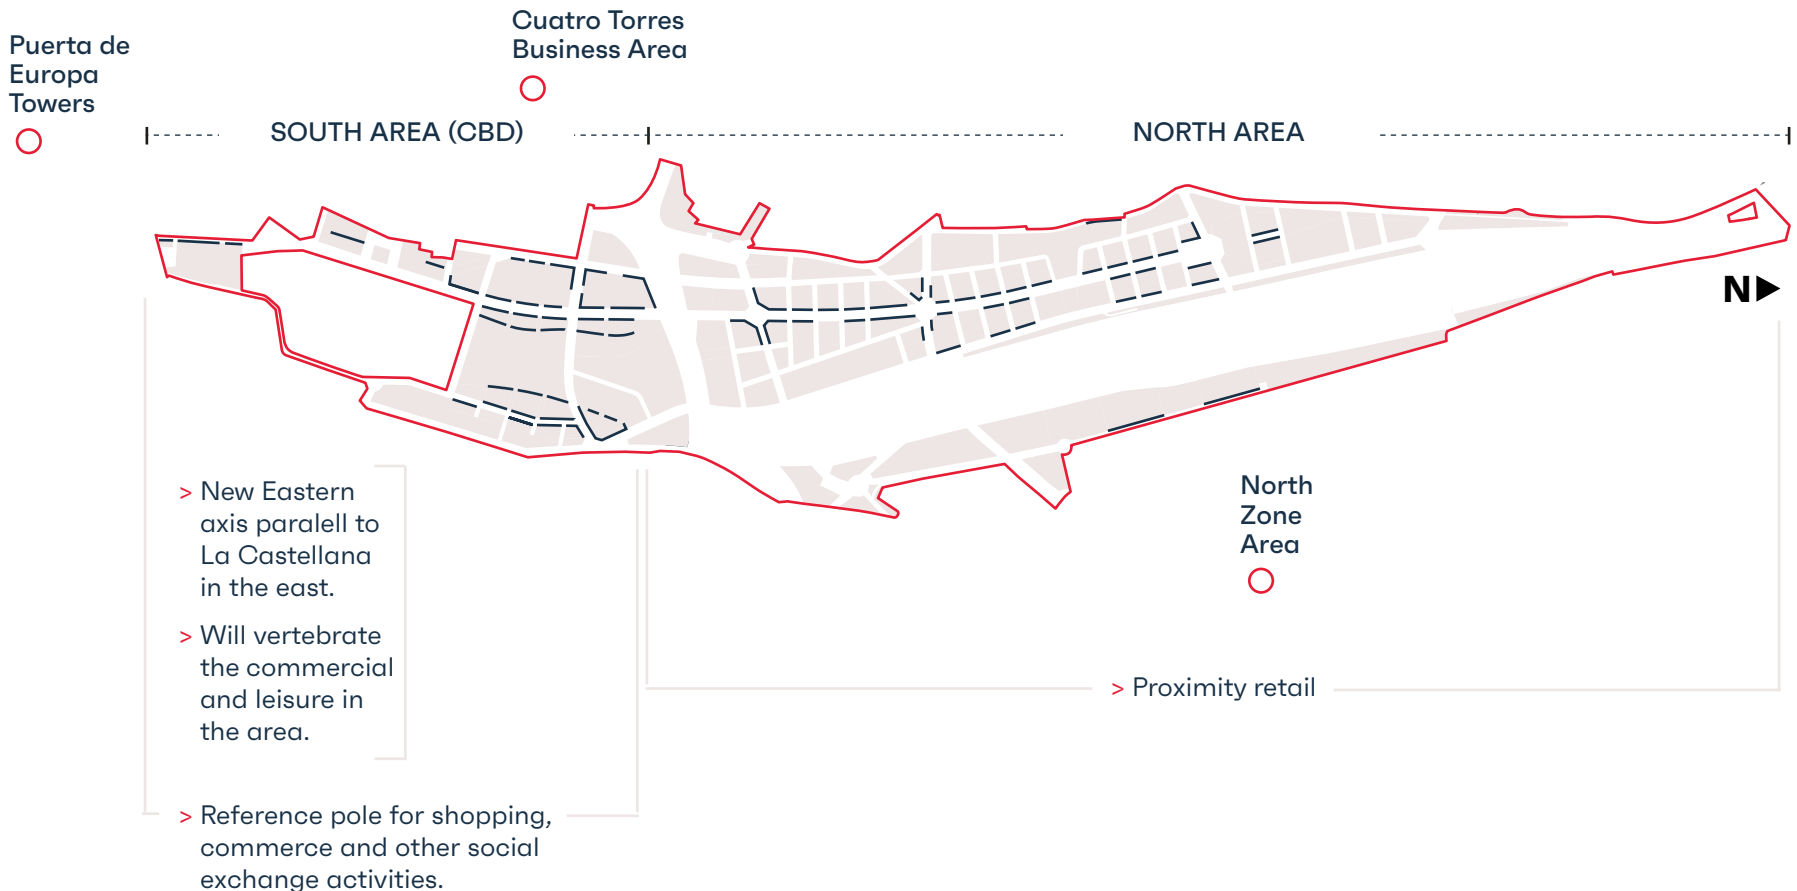

Retail market opportunities

Market context and trends

- > International trends are moving increasingly towards street-level retail and shopping in urban environments that make pedestrians a priority.

Locating your business in the new icon of Madrid

The proposal of Madrid Nuevo Norte

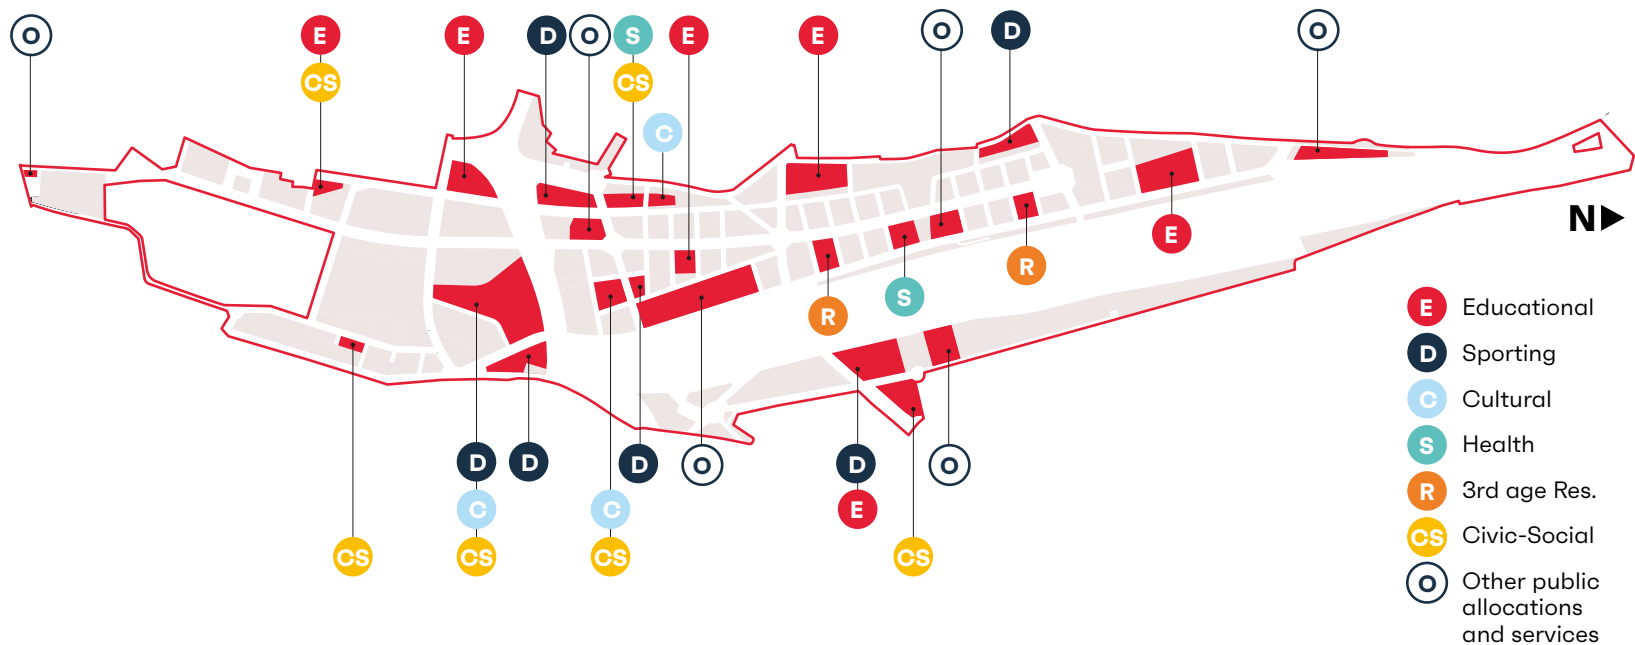

Landmark facilities

Public facilities in Madrid Nuevo Norte

The generous volume of space dedicated to social infrastructure will leverage residents for educational services, health facilities or spaces for cultural venues.

But far beyond a response for local needs, the project foresees the use of reserved public land as a reference site to complement existing educational, health clusters or a cultural magnet that will position the uniqueness of the place. Madrid Nuevo Norte has identified 4 singular land plots to generate a magnet site to boost the project. Proposals currently under analysis are oriented to life sciences sector, the expansion of Madrid existing cultural proposal, higher education and start-up incubators.
