Strategy

At Madrid Nuevo Norte, we are developing a tailored transformative urban project to revitalise the entire city.

Our brand combines all the elements that make Madrid a unique place and our innovative perspective for this project.

A strategic framework that everyone must follow to align all our efforts and build value.

Our platform

Purpose

Enable future generations to inherit cities that symbolise the best of what we are and what we can become.

Brand essence

What makes us unique

Reimagining Madrid

Values

What we believe in

Brining together the traditional and the cosmopolitan

The project showcases our city's past and highlights its unique identity. Like Madrid, we are connected to the world. The project incorporates the latest trends, yet stays true to the spirit of Madrid and creates the new city from our authentic perspective. An internationally revolutionary and truly unique proposal.

Quintessentially iconic

The project will become a recognised part of the city, transforming it and representing the identity of Madrid and Spain in an innovative and original way. Making the city into an international icon. That's why the project must be extraordinary and always go one step further. Excellence is not sporadic; it is reflected in every element of the project.

People: at the heart of what we do

People give meaning to the city, not the other way around. This is a project for people, and takes their present and future circumstances into account. A space where the use of innovation and technology benefits us all. A human space that puts people first right from the start. An integrated space that breaks down borders and unites people.

Committed to the future, today

A space that is integrated into the present but always looking towards the future. Working from within for a future that is more sustainable, efficient, and has a circular economy that drives change for the city. A new model that reflects a way of living and understanding urbanism in the 21st century. A space to develop everything that we improve as a society.

Personality

How we act

We're idealists

Optimistic - Resilient - Enthusiastic

Position

Our position defines what we do and helps us explain who we are

We are a new area of Madrid that will lay the foundations for the future. We capture the essence of the city but update, modernise, and strengthen it. A project that is **Reimagining Madrid**.

A project to transform Madrid

Created to **become an icon** of the city as a whole, integrating neighbourhoods, enhancing the city's image, reflecting the 21st century way of life, and symbolising **a new era for the city**. Designed for people from day one: **for the citizens**, for tourists, for all the talented people who will come to city who, though they may leave, will never leave completely.

Because...

Madrid has the potential to make a difference and be an **international benchmark**.

Madrid has everything you can imagine and a lot that you can't, much of which must be lived to be understood.

Madrid has a lot to give in the future, because Madrid already has a lot to give, but it **can give so much more**.

Our storytelling

Our way of speaking, inspired by the values and essence of our brand, shows our personality and tone of voice

The goal is to connect with our audiences emotionally

“

If you had to imagine the future of Madrid, what would it be like?

At Madrid Nuevo Norte, we have not only imagined this, but are going to make it a reality by developing **one of the largest urban projects in the world.**

A project in the north of Madrid, **an area full of possibilities,** with a gap between neighbourhoods that we are going to fill.

For Madrid and for everyone; for the current and future residents, those who are passing through, and those who come and never leave.

A new Madrid tailored to you, your life, your work, your free time, your family and your friends. It's going to be everything you imagine and maybe a little more.

Because Madrid is open and we're going to **connect it to the world,** because Madrid is full of talent and we can encourage it.

Madrid is a city full of dreams and **with Madrid Nuevo Norte, we're going to make them come true.**

Our logo

This is our logo. Our signature. Our most identifying element. The symbol is created by joining the M, the N and the N of Madrid Nuevo Norte, and represents the union of neighbourhoods, ideas and cultures; it symbolises the way forward for Madrid and the people of Madrid; it is a symbol of integration for all.

This is the main version of our logo.

7. The zipper
8. Photography
9. Illustration
10. *Motion*
11. Pictograms
12. Applications

Flexibility

The main version of the logo is horizontal, but there is a vertical logo when required due to formatting requirements. In both versions, the proportions between symbol and wordmark can be adjusted as required.

The use of the symbol dissociated from the wordmark will be applied when logo is difficult to read due to space limitations. The text Madrid Nuevo Norte should appear somewhere on the piece.

12. Applications

Size and margins

To calculate the size of the logo, divide the shortest side of the format by 10, the result will be the size of the logo symbol. If you need a larger logo, divide it by 8 or 9.

To calculate the margins, shrink the size of the symbol by 40% and this distance will be the restricted area of the piece.

Position the logo as needed, bearing in mind that the preferred positions are in the upper corners of the format.

Reserve area and minimum sizes

To ensure proper visibility of our logo, don't invade the reserve area of our brand with any other element.

This area is generated by applying twice the thickness of the logo symbol on all sides of the logo, as shown on this page. A minimum size has also been established for the printed use of the logo.

Main palette

This is our main colour palette. It shows our character and how we want to present ourselves to the rest of the world. Red symbolises our passion and energy and is a colour that identifies us as *Madriños*. The blues bring luminosity and vitality, bringing us closer to our daytime and night-time skies. Beige adds warmth and shows our human side and the focus on people.

**As
a connector**

One of the options of the zipper is to join concepts and create simple, high-impact graphics that tell a story visually.

3. Logo
4. Slogan
5. Colour
6. Typography
- 7. The zipper**
8. Photography
9. Illustration
10. *Motion*
11. Pictograms
12. Applications

**As
a connector**

You can also make the zipper interact with the images or with the words by arranging some parts of the words in front of it and others behind it, creating an effect of connection and three-dimensionality.

- 1. Strategy
- 2. Tone of voice
- 3. Logo
- 4. Slogan
- 5. Colour

- 7. The zipper**
- 8. Photography
- 9. Illustration
- 10. *Motion*
- 11. Pictograms
- 12. Applications

**Incorrect
uses**

Always use the zipper orientation that best suits the format, making sure that it connects the two concepts visually.

***Lifestyle
photography***

These photographs show our full commitment and focus on people, because they are the heart of our brand.

Photographs need to show fresh and natural scenes, always avoiding posed and forced arrangements. Dynamic images that capture a moment. Bright, warm photographs, full of light and positivity.

1. Strategy
2. Tone of voice
3. Logo
4. Slogan

**Lifestyle
photography**

Our images need to show all of the diversity of the people who live in Madrid. The images should convey the welcoming, innovative spirit of our brand personality.

**Overhead
photography**

These images should show green spaces, sports areas, meeting places and enjoyment of the urban area, where the human and the architectural interact with a bird's eye view.

1. Strategy
2. Tone of voice
3. Logo

Pictograms

We've created our own style of pictograms that help us to complement our communications, to increase consistency and brand recognition.

Our pictograms are line drawings and always with basic geometric shapes.

12. Applications

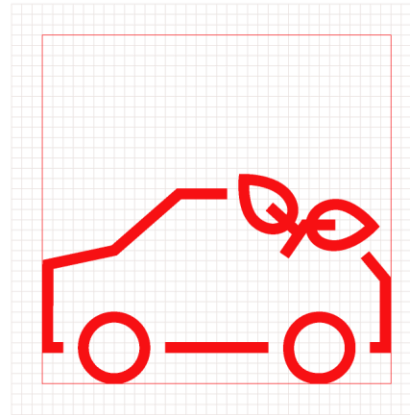

Creating pictograms

To ensure uniformity of all pictograms, start with a grid of 34 x 34 modules. The pictogram lines are 1 module thick.
